Who We Are

AZDEX Chemicals is an industrial commodities and raw materials supplier focused on serving manufacturers, traders, distributors and bulk buyers. We work across product categories where quality, timing, commercial clarity and reliable execution matter.

Our focus is straightforward: connect global supply with industrial buyers through practical sourcing, clear communication and responsive support from enquiry to delivery.

Serving manufacturers, traders,
distributors & bulk buyers

Vision

To be a trusted global supply partner for industrial growth.

Mission

To deliver the right materials, at the right time, with commercial clarity and care.

Values

Integrity · Reliability · Responsiveness · Partnership

Commitment

Long-term relationships built on trust, performance and mutual success.

Why AZDEX

We go beyond supply. We support your business.

Reliable Sourcing

Access to quality materials from reliable producers across key regions.

Commercial Expertise

Practical solutions aligned to market conditions and buyer needs.

Multi-country Procurement

Sourcing options across India, China, GCC and other international origins.

Documentation Support

COA, SDS, TDS and other documents supporting smooth transactions.

Responsive Communication

A dedicated team to support you from enquiry to delivery and beyond.

The right material. The right time. The right partner.

Global Supply Network

Strategic sourcing. Global reach. Local understanding.

China

Strong supplier base and manufacturing capability.

India

Domestic strength and reliable manufacturing base.

GCC

Strategic access to key trade routes and markets.

International Sourcing Capability

We support requirements across multiple origins and destinations with market-aware execution.

Origins & destinations mapped for every enquiry

Our Product Portfolio

Industrial raw materials for critical applications.

**Technical Grade
Urea**

Soda Ash

Caustic Soda

PVC Resin

Melamine

Calcium Nitrate

Boron Products

*Additional
commodities available
based on buyer
requirements.*

Quality. Consistency. Commercial Clarity.

Technical Grade Urea

Industrial-grade urea for resins, adhesives, plywood, DEF/SCR and other downstream applications where grade consistency and quality matter.

APPLICATIONS

- Urea-formaldehyde resin
- Adhesives
- Plywood and panel applications
- Diesel exhaust fluid (DEF/SCR)
- Dyes and pigments
- Industrial formulations based on buyer requirement

Industries

Plywood, Resin,
Automotive, Textile

Packaging

50 kg bags

Origins

China & selected
international origins

Exact supply specifications should always be confirmed against current lot documents and buyer requirements.

Soda Ash – Dense & Light Grades

Dense Grade

Higher bulk density suitable for glass manufacturing and heavy-duty industrial applications.

Light Grade

Lower bulk density ideal for detergents, chemicals and industrial formulations.

APPLICATIONS

- Glass manufacturing
- Detergents & cleaning products
- Water treatment
- Sodium silicate manufacturing
- Chemical processing

Packaging

50 kg bags (subject to current packing availability and quotation stage confirmation).

Typical Supply Origins

India and selected international origins, subject to availability, documentation and applicable trade requirements.

**Dense & Light
Grades Available**

Caustic Soda - Flakes & Lye (Liquid)

Flakes

Solid flakes form, easy to handle, store and dose for a wide range of industrial processes.

Lye (Liquid)

Liquid form for continuous processes and applications requiring solution strength.

APPLICATIONS

- Detergents & cleaning products
- Pulp and paper
- Textile bleaching, dyeing & mercerising
- Water treatment & pH adjustment
- Chemical manufacturing & processing
- Aluminum processing
- Soap & glycerin manufacturing

BIS Information

Caustic Soda is covered under IS 252:2013 and included in the Bureau of Indian Standards (Caustic Soda) Order, 2018. Grade, certification and documentation are confirmed before order.

PVC Resin - Suspension Grade

Grades

Suspension grade PVC resin suitable for a wide range of downstream plastic processing applications.

Packaging

25 kg bags (subject to packing availability and quotation stage confirmation).

APPLICATIONS

- Pipes & fittings
- Cables & wires
- Profiles & conduits
- Films & sheets
- Injection & extrusion moulding
- Other industrial plastic products

Industries Served

- Pipes & Fittings
- Construction
- Electrical
- Automotive
- Consumer Goods
- Packaging
- Agriculture
- Industrial Manufacturing

Melamine

High-purity melamine for use in resins, laminates, molding compounds and flame-retardant formulations where performance and purity matter.

APPLICATIONS

- Melamine-Formaldehyde (MF) resins
- Laminates and decorative surfaces
- Molding compounds
- Flame retardant formulations
- Coatings and adhesives
- Paper and textile finishing

CAS No.
108-78-1

Industries

Laminates, Wood Panels,
Molded Plastics, Coatings,
Textile, Paper

Packaging

25 kg bags
Big bags on request

Origins

China & selected
international origins

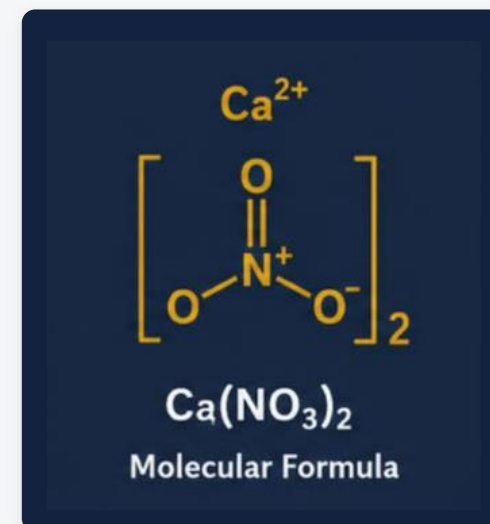

Exact supply specifications should always be confirmed against current lot documents and buyer requirements.

Calcium Nitrate

High-purity calcium nitrate for use in fertilizers, industrial processes, concrete admixtures and other technical applications.

APPLICATIONS

- Fertilizers and soil nutrition
- Concrete admixtures
- Industrial water treatment
- Desiccant and drying agent
- Road de-icing and dust control
- Other industrial applications

CAS No.
10124-37-5

Industries

Agriculture, Construction,
Water Treatment, Chemical
Manufacturing, Road Maintenance

Packaging

25 kg bags
50 kg bags
Big bags on request

Origins

China & selected
international origins

Exact supply specifications should always be confirmed against current lot documents and buyer requirements.

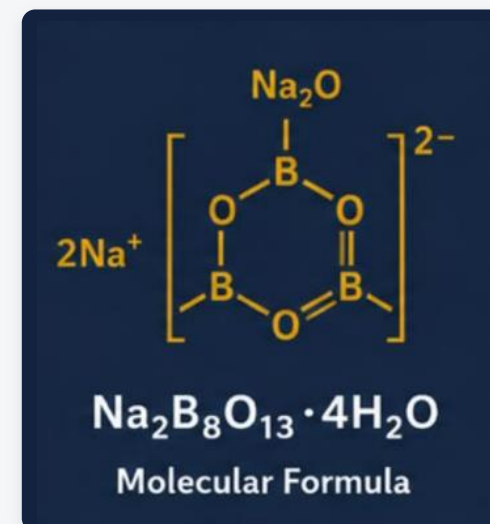

Boron 20%

(Disodium Octaborate Tetrahydrate)

High-purity boron 20% (disodium Octaborate tetrahydrate) for use in detergents, glass, ceramics, metallurgy, agriculture and other industrial applications.

APPLICATIONS

- Detergent and cleaners
- Glass and enamel manufacturing
- Ceramics and glazes
- Metallurgy and foundry flux
- Agricultural micronutrient
- Other industrial applications

CAS No.
12280-03-4

Industries

Detergents, Glass, Ceramics,
Metallurgy, Agriculture,
Foundry, Industrial Cleaning

Packaging

25 kg bags
50 kg bags
Big bags on request

Origins

China & selected
international origins

Exact supply specifications should always be confirmed against current lot documents and buyer requirements.

Industries Served

Supplying industrial raw materials that keep industries moving.

Resin & Adhesives

Plywood & MDF

**Glass
Manufacturing**

Water Treatment

**Textile & Process
Industries**

**Detergents &
Cleaning Products**

**Chemical
Manufacturing**

**Other Industrial
Applications**

Supplying industrial raw materials that keep industries moving.

Supply Chain Capabilities

Procurement

Understanding requirements and identifying the right material and grade.

Supplier Qualification

Working with trusted manufacturers and reliable global suppliers.

Documentation

Supporting COA, MSDS, TDS, packing list, COO and other required documents.

Shipping Coordination

Managing logistics, bookings and freight options with care.

Customs & Clearance

Supporting import/export documentation and regulatory compliance.

Delivery

Timely delivery to destination port or customer location.

OUR COMMITMENT

Clear communication, practical solutions and dependable execution at every stage of the supply chain.

Quality & Documentation Support

We ensure proper documentation and quality support for every shipment.

COA

Certificate of Analysis

SGS

Inspection (if applicable)

MSDS

Material Safety Data Sheet

TDS

Technical Data Sheet

Packing List

Detailed packing information

COO

Certificate of Origin

Commercial Invoice

As per trade requirements

All documents are provided as per buyer requirements and applicable trade regulations.

Why Buyers Choose AZDEX

We focus on what matters most to industrial buyers.

Fast Quotations

Quick response and clear commercial offers to keep your operations moving.

Technical Understanding

Strong product knowledge and application understanding to match your requirements.

Multiple Sourcing Options

Access to multiple origins and suppliers for reliable and competitive supply.

Commercial Clarity

Transparent pricing, trade terms and payment conditions.

Reliable Execution

Documented processes and coordination from order to delivery.

Responsive Communication

Dedicated team support throughout the supply process.

Your success is our priority.

Packaging & Logistics

Flexible packaging and logistics solutions to match your supply needs.

Bagged

50 kg bags, subject to packing availability and quotation stage confirmation.

Jumbo Bags

Flexibility in packing sizes to suit handling and application needs.

Bulk Supply

Bulk supply options, including tankers and silo delivery, where applicable.

Containers

20' / 40' containers for bagged or granular material supply.

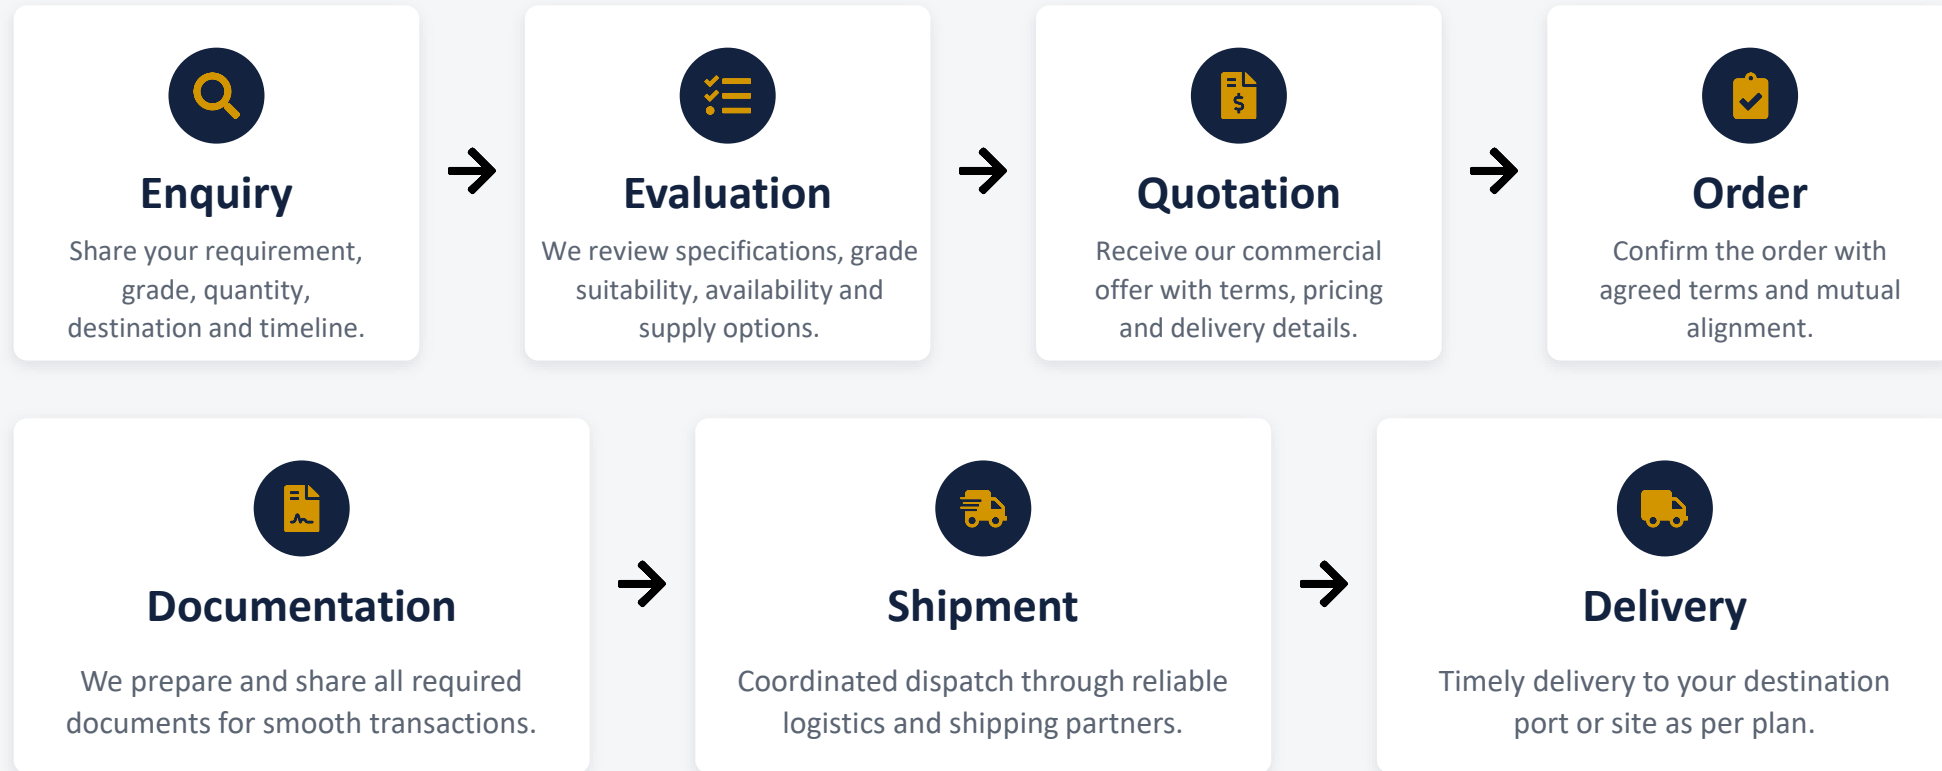

Breakbulk

Breakbulk and project cargo arrangements based on shipment requirements.

We work with trusted logistics partners to ensure safe, timely and compliant delivery.

Our Process

A clear and reliable process from enquiry to delivery.

PARTNER WITH US

Let's build a reliable, long-term supply partnership.

Share your requirement today and our team will respond with the most practical supply option.
